iQ

The intelligent choice for micropigmentation & dermapigmentation

The minimalistic design is striking. The stainless steel cover and smooth touch screen are modern, hygienic and efficient. The iQ combines proven technology with a state-of-the-art look. With 70-150 needle insertions per second, iQ is ultra-precise. This makes iQ suitable for micropigmentation and medical applications such as scar camouflage, areola reconstruction, skin re-pigmentation and other procedures. There are four pre-programmed settings for eyebrows, eyes, lips or dermapigmentation. The iQ automatically sets the needle pressure and needle frequency. During pigmentation, the iQ handpiece constantly measures the skin resistance and automatically adjusts the needle frequency and needle pressure for optimal and even pigmentation. The right balance ensures the best results and precise pigmentation.

The LCD touch screen display shows the selected treatment and needle speed. There are 20 needle formations available for iQ.

Nouveau Contour SMART. The smart choice for all micropigmentation procedures.

A compact device with easy operation and an excellent price/quality ratio. Design and functionality are united in a modern, hygienic and efficient look. The SMART is a premium class device that offers you more mobility due its compact dimensions. With 70-150 needle insertions per second and 20 needle formations to choose from, this small but powerful device is ultra precise. Which makes Nouveau Contour SMART a clever choice for all micropigmentation procedures, such as eyebrows, eyeliners and lips.

Be clever, choose Nouveau Contour SMART!

Safety handpiece for iQ & Smart

The Nouveau Contour SMART and iQ are both delivered with the Safety handpiece on which the patented Safety needle modules are attached. The moment you hold the hand piece, you feel the quality difference. It feels more stable than any other hand piece. The needle depth can be set by means of the unique 'Easy-Turn Depth' system. To accurately adjust the needle length, simply turn the hand ring setting ring. The needle length is set in fractions of millimeters, tailored to the skin type and treatment technique you apply. The handpiece is made of cast aluminum, does not get warm and is extremely light for comfortable working.

Safety handpiece for €895,-

There are 20 needle configurations available.

Compatible with IQ, Smart & Sharp

Power to the pro's! This short and lightweight handpiece is THE tool for professional PMU artists only. Ergonomically shaped and with a minimum vibration the Power Pro is a dream to work with. The powerful hand piece let needles go in and out the skin at the highest speed for the fastest and smoothest pigment implementation ever. Gaining time and money!

Due to the 2,5 mm needle stroke length within the needle cartridge, the pigment implantation is optimized and efficient. The desired needle length is easily set with the handpiece's precision scale. Excellent for hair strokes, lining techniques and shading techniques (ombré, powder, pixel etc). The Power Pro handpiece allows you to reach the best results, in less time!

Compatible with Sharp

Exclusively for Sharp

This handpiece is exclusively designed for the Sharp device. It is slim and easy to work with for both beginners and experienced pmu professionals. The ergonomic handpiece is comfortable to work with. It is compact, very quiet and powerful. All advanced PMU procedures and techniques can be performed with the highest possible safety and precision. From ultra fine hairstrokes to shading and pixel techniques!

Optimized skin penetration ensures minimal trauma to the skin. For a less painful treatment, a shorter healing period and great pigment retention.

The 7 most essential needle formations are available at competitive prices.

This handpiece is only available in combination with the Sharp.

Safety Cartridge Needles

Nouveau Contour is extremely concerned with the threat of fluid cross-contamination to the hand piece. The Nouveau Contour patented, Safety needle system prevents from fluid cross contamination. Verifiably, traditional machines are subject to airborne and fluid cross-contamination.

Unique Needle Cartridge System

Tests have proven that the risk of cross contamination with traditional machines due to possible backflow of liquids and circulation of contaminated air within the hand piece is prevalent.

For the safety of both the technician and the client, the Nouveau Contour Needle Cartridge System works unlike anything on the market today. The needle and the needle "tube" are integrated in one disposable cartridge system. Internal diaphragms halt and prevent fluid and airborne contaminants from entering the hand piece, which is therefore completely independent of the disposable cartridge and void of any possibility of cross-contamination. When the cartridge is detached from the hand piece the needle automatically retracts back into the cartridge, preventing an accidental "stick" to the technician, or client. The safety needles fit on the Nouveau Contour safety hand piece. The system is therefore void of any possibility of cross contamination. Available in 21 different needle formations.

Safety first!

Nouveau Contour realizes that it is imperative that the disposable tube/needle cartridges be sterilized. Each cartridge is packed separately in a class 100.000 clean room and sterilized using EO gas to prevent disease transmission. The entire cartridge, which contains the needle, can then be disposed of properly. Another safety feature is that when the cartridge is detached from the hand piece the needle automatically retracts back into the cartridge, preventing an accidental "stick" to the technician, or client.

Round-tip Needles

1-point Nano NT needle

Ultra fine, high quality needle. The steel tube at the tip gives less vibration on the needle. The innovative tunnel provides more stability which results in extraordinary pigment deposit and ultra sharp hairstrokes. Only for experienced technicians.

1-Point Nano Needle 0.20 mm

Create ultra-sharp and crispy lines with our thinnest nano needle. Generates smaller size perforations. Always use 2 tones darker than usual for optimal results. For experienced technicians only.

1-Point Nano Needle 0.25 mm

Our second thinnest needle, this penetrates the skin shaft at 0.15MM. Always use 2 tones darker than usual for optimal results. For experienced technicians only.

1-Point Micro Needle

Great for creating fine hair strokes. Be careful not to go too deep into the skin as there is less resistance of the skin when using the micro needle.

1-Point Liner Needle

Suitable for fine hair strokes and detailed lines, such as lip corners. Remain watchful against signs of scarring and do not inject the pigment too deeply to avoid too dark a color.

3-Point Micro Needle

The 3-point micro needle is thinner than the regular 3-point needle. Suitable for ultra-fine lines, such as lower eyeliner and lip corners. Do not inject the pigment too deeply to avoid too dark a color.

3-Point Outline Needle

A 3-point needle whereby one of the points protrudes in the direction of the supply opening. Suitable for making a distinct contour to define a high eyeliner, semi hair strokes, and the outer corners of the lips.

3-Point Liner Needle

Suitable for drawing lines in eyebrows, fine lip lines, and eyeliner with lash-broadening effect.

5-Point Round Needle

Suitable for soft eyebrows, wide eyeliners and lip liners.

5-Point Shader Needle

The 5 shader is commonly used to create soft shaded brows, fill in lips and to create a smudged look for eyeliner. It is also a good choice for camouflage work and to fill in the areola.

7-Point Round Needle

Has an open, round needle form and is suitable for very wide upper eyeliners and the partial coloring in of the lips.

Flat-tip Needles

4-Point Flat Needle

Four needles in a row. Suitable for the hair-stroke technique for eyebrows, by applying the 'scoop' technique. The result is a very natural look of eyebrow hairs. (Master Training Course Hair stroke)

5-Point Magnum Needle

Flat form comprising 5 needles in 2 rows. Suitable for smokey eyeliners, wide and high eyeliners, and the coloring in of lips using the circling technique. (Master Training Course Advanced Eyeliner) (Master Training Course Advanced Lip)

9-Point Magnum Needle

Flat form comprising 9 needles in 2 rows. Suitable for a subtle coloring in of large areas. (Master Training Course Areola) (Master Training Course Advanced Lip)

Digital Blading Needles

Digital Blading 5-Point Sloped-Tip Needle

Flat form comprising, 5 nano needles in a row. For experienced technicians only. Designed especially for digital blading. Creates razor sharp hair strokes and is suitable for all skin types. Suitable for 'digital blading' in a somewhat bolder eyebrow.

Sloped-tip Needles

3-Point Sloped-Tip Needle

Flat form comprising 3 needles in a row. Suitable for relatively high eyeliners, a wide lip liner, or the partial coloring in of lips. (Experience desired when working with this needle)

5-Point Sloped-Tip Needle

Flat form comprising 5 needles in a row. Suitable for a very high, advanced eyeliner, and full lips without lip liner. (Master Training Course Advanced Eyeliner) (Master Training Course Advanced Lip)

Power-tip Needles

3-Point Power Needle

Extra sharp 3-point needle for more precise work than a regular 3-point needle will allow. Suitable for the shading of eyebrows and the drawing of fine eyeliners and lip liner.

5-Point Power Needle

Extra sharp 5-point needle for more precise work than a regular 5-point needle will allow. Suitable for the shading of eyebrows and the drawing of somewhat wider eyeliners.

7-Point Power Needle

Extra sharp 7-point needle for more precise work than a regular 7-point needle will allow. Suitable for the subtle shading of eyebrows and the drawing of wide upper eyeliners, a wide lip liner, and a partial shading of lips.

These needles are available for the Sharp Device

Sharp Needles

1-Point Liner Needle

Suitable for fine hair strokes and detailed lines, such as lip corners. Remain watchful against signs of scarring and do not inject the pigment too deeply to avoid too dark a color.

1-Point Nano Tube Needle

Ultra fine, high quality needle. The steel tube at the tip gives less vibration on the needle. The innovative tunnel provides more stability which results in extraordinary pigment deposit and ultra sharp hairstrokes. Only for experienced technicians.

1-Point Nano Needle

Create ultra-sharp and crispy lines with our thinnest nano needle. Generates smaller size perforations. Always use 2 tones darker than usual for optimal results. For experienced technicians only.

3-Point Outline Needle

A 3-point needle whereby one of the points protrudes in the direction of the supply opening. Suitable for making a distinct contour to define a high eyeliner, semi hair strokes, and the outer corners of the lips.

3-Point Micro Needle

The 3-point micro needle is thinner than the regular 3-point needle. Suitable for ultra-fine lines, such as lower eyeliner and lip corners. Do not inject the pigment too deeply to avoid too dark a color.

3-Point Nano Slope Needle

Flat form comprising 3 ultra thin needles in a row. Suitable for relatively high eyeliners, a wide lip liner, or the partial coloring in of lips (Experience desired when working with this needle).

5-Point Magnum Needle

Flat form comprising 5 needles in 2 rows. Suitable for smokey eyeliners, wide and high eyeliners, and the coloring in of lips using the circling technique. (Experience desired when working with this needle).

Organic Pigments

Very high concentration of pigment, bright colors, limited follow-up treatments

The Organic pigments of Nouveau Contour are organic and free of iron oxides: your guarantee that they are void of nickel impurities. The product composition contains less alcohol: the same pigment volume contains more pigment. The result? A higher concentration of pigment will remain in the skin, resulting in bright colors. An additional advantage is that the low concentration of alcohol will dry out the pigment less quickly.

The formulation is developed with unique bonding materials, allowing for optimal skin implementation and pigment retention. The Organic pigments have excellent flow properties which enables effortless pigment deposit. During the procedure, the pigment is more easily inserted into the skin. The colors remain clear and fresh. After healing, the results are very natural and follow-up treatments are limited.

The Organic pigment range includes 44 colors, 9 eyebrow colors, 6 microblading colors, 3 eye colors, 12 lip colors, 5 areola colors, 4 camouflage colors and 5 areola colors.

Fusion Pigments

Bright, intense colors and excellent pigment retention

The Fusion line combines organic and inorganic ingredients in an innovative pigment formula.

The advantage of the inorganic component is that the pigments remain very stable in the skin. The safe iron-oxides meet all stringent international regulations regarding nickel impurities. These carefully selected iron-oxides will give you the extra boost of nearly immediate real life color in the skin, intense color saturation and optimal color retention, therefore nearly eliminating touch-up procedures.

The organic component -free from iron oxides- ensures the clear color and good pigment retention. After healing, the colors are bright, extremely soft and very natural.

This pigment line is indispensable for eyebrow treatments. Nouveau Contour Fusion pigments are ideal for the ombre technique with amazing results. Hair strokes can also be set very accurately and perfectly.

The Fusion line includes 12 eyebrow colors, 10 lip colors and 4 correction colors.

Color Identification System

Nouveau Contour's unique Color Identification System simplifies the complexity of color theory, making it easy to choose the correct pigment for each procedure and every skin type. All of the relevant information is available for each pigment color, providing technicians with added confidence in the color outcome of the skin.

The Color Identification System helps you to:

- Choose the correct pigment for each procedure & every skin type
- Immediately identify which pigment to add to make a color darker or lighter
- Recognize if the undertone is warm, cool or neutral
- Obtain a clear description of the pigment

Pigment display

Show pigments in style on this universal pigment display with LED. The display can show up to 18 pigment bottles. Next to a general top card, there are 4 topcards of choice: general, lips, eyes and brows.

Accessories

Nouveau Contour offers a wide range of accessories to make the assortment complete, from pigment cups to after treatment cream and informed consent to after care instructions. Not only the accessories you need for performing micropigmentation, but also promotional materials like consumer leaflets, posters, appointment cards, gift certificates and many more. All materials are offered in the luxury Nouveau Contour style.

With Nouveau Contour your clients know you stand for quality and professionalism down to the smallest detail.

Success is in your hands!
